EngineerJobs.com is the brainchild of a CareerBuilder veteran.

As much as anyone in the industry today, he understands how to deliver quality candidates. More importantly, he understands that, while a focus on generating blunt force numbers may boost a site's stock price, it does not serve the site's customers. Which is why (unlike CareerBuilder) **Engineer Jobs.com strictly limits its postings to specific, legitimate engineering jobs** directly relevant to the professionals we serve.
